Spill or Leak Procedures

Released or Spilled: eq ne cir are sp Pr to ree		Exposure to the spilled material may be severely irritating or toxic. Follow personal protective equipment recommendations found in Section 8 of this SDS. Personal protective equipment eeds must be evaluated based on information provided on this sheet and the special ircumstances created by the spill including; the material spilled, the quantity of the spill, the trea in which the spill occurred, and the expertise of employees in the area responding to the pill. Never exceed any occupational exposure limits. Avoid dusting. Prevent the spread of any spill to minimize harm to human health and the environment if safe to do so. Wear complete and proper personal protective equipment following the ecommendation of Section 8 at a minimum. Dike with suitable absorbent material like tranulated clay. Gather and store in a sealed container pending a waste disposal evaluation.
