MATERIAL SAFETY DATA SHEET |-----

_____ SECTION 1 - CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME : DAP SPACKLING PASTE

UPC NUMBER : 7079810200, 7079810204, 7079810205
PRODUCT USE/CLASS : Latex Spackling

24 HOUR EMERGENCY: MANUFACTURER:

DAP INC. TRANSPORTATION: 1-800-535-5053 (352-323-3500) 2400 BOSTON STREET MEDICAL : 1-800-327-3874 (513-558-5111)

BALTIMORE, MD 21224

PREPARE DATE : 08/30/1996 GENERAL INFORMATION:

REVISION NO. : 13 DAP INC.: 1-888-DAP-TIPS (1-888-327-8477)

REVISION DATE: 12/30/2004

|-----| SECTION 2 - COMPOSITION/INFORMATION ON INGREDIENTS

ITEM	CHEMICAL NAME	CAS NUMBER	RANGE
01	Calcium Carbonate	1317-65-3	65.0-70.0 %
02	Magnesium Aluminum Silicate(polygorskite)	12174-11-1	1.0-5.0 %
03	Crystalline silica	14808-60-7	0.1-5.0 %
04	Vinyl Acetate	108-05-4	0.01-0.3 %

		1	EXPOSURE LIMITS				
	ACGI	H	OSHA		COMPANY		
ITEM	TLV-TWA	TLV-STEL	PEL-TWA	PEL-CEILING	TLV-TWA	SKIN	
01	10 mg/m3	N.E.	15 mg/m3	N.E.	N.E.	NO	
02	N.E.	N.E.	N.E.	N.E.	N.E.	NO	
03	0.05 mg/m3*	N.E.	10 mg/m3dust	N.E.	N.E.	NO	
04	10 ppm	15 ppm	N.E.	N.E.	N.E.	N.E.	

(See Section 16 for abbreviation legend)

* The 2001 ACGIH Threshold Limit Values for Chemical Substances and Physical Agents lists the median Respirable Particulate Mass (RPM) point for crystalline silica at 4.0 microns in terms of the particle's aerodynamic diameter.

Listed Permissible Exposure Levels (PEL) are from the U.S. Dept. of Labor OSHA Final Rule Limits (CFR 29 1910.1000); limits may vary between states.

Remaining ingredients are not considered hazardous per the OSHA Hazard Communication Standard.

Product Name: DAP SPACKLING PASTE
Revision Date: 12/30/2004 Page 2

|-----| | SECTION 3 - HAZARDS IDENTIFICATION |

POTENTIAL HEALTH EFFECTS:

EFFECTS OF OVEREXPOSURE - EYE CONTACT: May cause eye irritation.

EFFECTS OF OVEREXPOSURE - SKIN CONTACT: May dry skin.

EFFECTS OF OVEREXPOSURE - INHALATION: Vapor may irritate nose and upper respiratory tract.

EFFECTS OF OVEREXPOSURE - INGESTION: None known.

EFFECTS OF OVER EXPOSURE - CHRONIC HAZARDS

The International Agency for Research on Cancer (IARC)has determined that crystalline silica in the form of quartz or cristobalite that is inhaled from occupational sources is carcinogenic to humans (Group 1- carcinogenic to humans). Refer to IARC Monograph 68, Silica, Some Silicates and Organic Fibres (published in June 1997) in conjunction with the use of these materials. The National Toxicology Program (NTP) classifies respirable crystalline silica as known to be a human carcinogen. Refer to the 9th Report on Carcinogens (2000). The American Conference of Governmental Industrial Hygienists (ACGIH) classifies crystalline silica, quartz, as a suspected human carcinogen (A2).

Breathing dust containing respirable crystalline silica may not cause noticeable injury or illness even though permanent lung damage may be occurring. Inhalation of dust may have the following serious chronic health effects: Excessive inhalation of respirable dust can cause pneumoconiosis, a respiratory disease, which can result in delayed, progressive, disabling and sometimes fatal lung injury. Symptoms include cough, shortness of breath, wheezing, non-specific chest illness and reduced pulmonary function. Smoking exacerbates this disease. Individuals with pneumoconiosis are predisposed to develop tuberculosis. There is some evidence that breathing respirable crystalline silica or the disease silicosis is associated with an increased incidence of significant disease endpoints such as scleroderma (an immune system disorder manifested by fibrosis of the lungs, skin and other internal organs) and kidney disease.

This product may contain small amounts of vinyl acetate. Vinyl acetate is identified by IARC as a potential carcinogen. Lifetime exposure to high vapor concentrations (600 ppm) of vinyl acetate caused malignant and benign tumors of the respiratory tract of rats, but not mice.; this response possibly being associated with the irritant effect. Vinyl acetate has been tested for carcinogenic potential in rats in two separate drinking water studies. In one study in which animals were exposed to concentrations up to 0.5% in water, there was no evidence of carcinogenicity. Male rates receiving vinyl acetate at high concentrations in drinking water (0.5%) for two generations possibly demonstrated a decreased ability to produce offspring. In the second study, conducted at higher concentrations (up to 1% in water), evidence of cancer in the stomach and oral cavities was observed. There is no evidence that has caused cancer in humans. There should be minimal risk when used with ventilation adequate to keep the atmospheric concentration of vinyl acetate below the recommended exposure limit.

Product Name: DAP SPACKLING PASTE Revision Date: 12/30/2004 Page 3
SECTION 4 - FIRST AID MEASURES
MEDICAL CONDITIONS WHICH MAY BE AGGRAVATED BY CONTACT: Asthma and asthma-like conditions may worsen from prolonged and repeated exposure.
PRIMARY ROUTE(S) OF ENTRY: SKIN CONTACT INHALATION
EYE CONTACT: Flush with large quantities of water until irritation subsides. Contact a physician.
SKIN CONTACT: Wash with soap and water.
INHALATION: Remove to fresh air. Contact a physician immediately.
INGESTION: DO NOT INDUCE VOMITING. Contact a physician or Regional Poison Control Center immediately.
COMMENTS: Call 1-800-327-3874 if irritation or complications arise from any of the above exposures.
SECTION 5 - FIRE FIGHTING MEASURES
FLASH POINT: >200 F(SETAFLASH CLOSED CUP) LOWER EXPLOSIVE LIMIT: N.A. UPPER EXPLOSIVE LIMIT: N.A. AUTOIGNITION TEMPERATURE:
EXTINGUISHING MEDIA: CO2 DRY CHEMICAL FOAM
UNUSUAL FIRE AND EXPLOSION HAZARDS: None known.
SPECIAL FIREFIGHTING PROCEDURES: Use water spray to cool exposed surfaces.
SECTION 6 - ACCIDENTAL RELEASE MEASURES
SPILL OR LEAK PROCEDURES: Scrape up dried material and place into containers.
SECTION 7 - HANDLING AND STORAGE

SECTION 7 - HANDLING AND STORAGE

CAUTION! Removal of this product after use will result in the generation of dust. If dry-sanded, exposure to dust may result in build-up of material in eyes, ears, nose, and mouth which may cause irritation.

HANDLING INFORMATION: KEEP OUT OF REACH OF CHILDREN. Keep containers away from excessive heating and freezing. Avoid skin and eye contact. Do not inhale dusts of this product.

STORAGE INFORMATION: Store away from caustics and oxidizers. Keep containers tightly closed when not in use. Keep containers from excessive heat and freezing. Do not store at temperatures above 120 degrees F.

(Continued on Page 4)

Product Name: DAP SPACKLING PASTE	
Revision Date: 12/30/2004	Page 4
SECTION 7 - HANDLING	AND STORAGE

OTHER PRECAUTIONS: None.

İ		SECTION	8 -	EXPOSURE	CONTROLS/PERSONAL	PROTECTION

ENGINEERING CONTROLS: If dry-sanding, provide sufficient mechanical ventilation to maintain exposure below PEL and TLV.

RESPIRATORY PROTECTION:

Dry sanding of dried product results in the generation of dust which contains crystalline silica. Avoid exposure to dust by wearing an appropriate, properly fitted, dust respirator during dry sanding. Follow respiratory manufacturer's directions for respirator use.

If the 8 hour exposure limit or value is exceeded for any component, use an approved NIOSH/OSHA respirator. Consult your safety equipment supplier and the OSHA regulation, 29 CFR 1910.134 for respirator requirements. A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions warrant a respirator's use.

The National Institute for Occupational Safety and Health (NIOSH) recommended permissible exposure limit of 50 micrograms respirable free silica per cubic meter of air (0.05 mg/m3) as determined by a full shift sample up to 10 hour working day, 40 hours per week.

EYE PROTECTION: Safety glasses with side shields recommended.

SKIN PROTECTION: Rubber gloves.

OTHER PROTECTIVE EQUIPMENT: None.

HYGIENIC PRACTICES: Remove contaminated clothing and wash before reuse.

ĺ	SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

BOILING RANGE : 210 - 220 F VAPOR DENSITY : Is lighter than air

ODOR : Mild Odor

APPEARANCE : Opaque paste EVAPORATION RATE: Is slower than Butyl

SOLUBILITY IN H2O : Soluble Acetate

SPECIFIC GRAVITY: 1.8690

VAPOR PRESSURE : 17.5 mm Hg @68F

PHYSICAL STATE : Paste

(See Section 16 for abbreviation legend)

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES	
SECTION 10 - STABILITY AND REACTIVITY	
ONDITIONS TO AVOID: Excessive heat and freezing.	
ICOMPATIBILITY: Strong oxidizers and caustics.	
ZARDOUS DECOMPOSITION PRODUCTS: Normal decomposition products, i	ı.e. COx
ZARDOUS POLYMERIZATION: Will not occur under normal conditions.	
'ABILITY: This product is stable under normal storage conditions.	
SECTION 11 - TOXICOLOGICAL PROPERTIES	
product or component toxicological information is available.	
SECTION 12 - ECOLOGICAL INFORMATION	
Information.	
SECTION 13 - DISPOSAL CONSIDERATIONS	
STE MANAGEMENT/DISPOSAL: This product does not meet the definitizardous waste according to U.S. EPA Hazardous Waste Management	ion of a
egulations, 40 CFR Section 261. State and Local regulations/restrate complex and may differ from Federal regulations. Responsibility	
oper waste disposal is with the owner of the waste.	
PA WASTE CODE - If discarded (40 CFR 261): None.	
SECTION 14 - TRANSPORTATION INFORMATION	
DECITOR 14 TRANSFORTATION INFORMATION	
T PROPER SHIPPING NAME: Not Regulated by D.O.T.	
T HAZARD CLASS: NONE	
T UN/NA NUMBER: NONE PACKING GROUP: NONE

	SECTION 16 - OTHER INFORMATION		_

This data is offered in good faith as typical values and not as a product specification. No warranty either expressed or implied, is hereby made. The recommended industrial hygiene and safe handling procedures are believed to be generally applicable. However, each user should review the recommendations in specific context of the intended use and determine if they are appropriate.
